"With regards to excellence, it is not enough to know, but we must try to have and use it." — Aristotle

Once upon a time
 there was a boy
 who lived in a land
 of dreams unreal...
 It's a nightmare daymare
 faster... faster...
 A trip to nowhere.

But he believed and
 he strived on and on...
 Until one day he awoke
 to find that
 things so unreal
 could be real.

In going where you have to go, and doing what you have to do, and seeing what you have to see, you dull and blunt the instrument you write with. But I would rather have it bent and dull and know I had to put it on the grindstone again and hammer it into shape and put a whetstone to it, and know that I had something to write about, than to have it bright and shining and nothing to say, or smooth and well oiled in the closet, but unused.

. . . For nursery magic is very strange and wonderful, and only those playthings that are old and wise and experienced like the Skin Horse understand all about it. "What is REAL?" asked the Rabbit one day. "Does it mean having things that buzz inside you and a stick-out handle?" "Real isn't how you are made," said the Skin Horse. "It's a thing that happens to you. When a child loves you for a long, long time, not just to play with, but REALLY loves you, than you become real." "Does it hurt?" asked the Rabbit. "Sometimes," said the Skin Horse, for he was always truthful. "When you are Real you don't mind being hurt."

"Does it happen all at once, like being wound up, or bit by bit?" "It doesn't happen all at once. You become. It takes a long time. That's why it doesn't often happen to people who break easily, or have sharp edges, or who have to be carefully kept. Generally, by the time you are Real, most of your hair has been loved off, and your eyes drop out and you get loose in the joints and very shabby. But these things don't matter at all, because once you are Real you can't be ugly, except to people who don't understand."

Oh God what a night
The moon so full
The stars so bright
A gentle breeze carresses soft
As it blows
The water ripples silent

Water shimmers in the moonlight

The paths of fish glimmer
On the sea
Sea wind and night
Tonight
They hold and cradle me

It is no good standing on dignity in a situation like this, and better not to try. It is a mystery. There they are, moving about in my cytoplasm, breathing for my own flesh, but strangers. They are much less closely related to me than to each other and to the free-living bacteria out under the hill. They feel like strangers, but the thought comes that the same creatures, precisely the same, are out there in the cells of sea gulls, and whales, and dune grass, and seaweed, and hermit crabs, and further inland in the leaves of the beech in my backyard, and in the family of skunks beneath the back fence, and even in that fly on the window. Through them, I am connected; I have close relatives, once removed, all over the place. This is a new kind of information, for me, and I regret somewhat that I cannot be in closer touch with my mitochondria. If I concentrate, I can imagine that I feel them; they do not quite squirm, but there is, from time to time, a kind of tingle. I cannot help thinking that if only I knew more about them, and how they maintain our synchrony, I would have a new way to explain music to myself.

THIS SONG IS DEDICATED TO THAT JUNIOR STUDENT WHO WILL BECOME:

THE KING OF SCUT

EVER SINCE I WAS A YOUNG KID
I REEMED THAT OLD IV.
FROM PHILLY DOWN TO FRISCO
I DID THEM ALL FOR FREE.
BUT I AIN'T SEEN NOTHIN' LIKE HIM
ON ANY HOSPITAL WARD,
THAT RESPECTACLED, WHITE COATED KID
SURE DOES MEAN SCUT, LORD!

HE STANDS LIKE A DOCTOR
DOESN'T SCARE THE PATIENT A'TALL
FEELIN' ALL THE SMALL VEINS
CAN SEE THEM FROM 'ROSS THE HALL
STICKS BY INTUITION, SEE THAT GOOD BLOOD SQUIRT.
THAT RESPECTACLED, WHITE COATED KID
SURE DOES MEAN SCUT WORK!

HE'S THE SCUT WORK KING
TO WATCH HIM IS A THRILL
A SCUT WORK KING
NEEDS PSYCHOMOTOR SKILL!

HOW DO YOU THINK HE DOES IT?
I DON'T KNOW. WHAT MAKES HIM SO SHARP?
NEVER GETS SWEATY TEMPLES
NEVER BLOWS A VEIN,
ALWAYS GETS THAT BLOOD GAS
NEVER HEARD HIM COMPLAIN
THAT RESPECTACLED, WHITE COATED KID
SURE DOES MEAN SCUT WORK!

I THOUGHT I WAS THE HOSPITAL KING OF SCUT
BUT I JUST HANDED MY NEEDED CROWN TO HIM

HE TRIES MY FAVORITE TECHNIQUE
HE CAN TOP MY BEST
THE NURSES LEAD HIM IN
HE JUST DOES THE REST
HE ALWAYS GETS THAT RED SQUIRT
NEVER SEEN HIM JERK,
THAT RESPECTACLED, WHITE COATED KID
SURE DOES MEAN SCUT WORK!

How often I saw where I should be going only by setting out for somewhere else. I have found that to be a doctor is to be a whole man who fulfills his task as a scientist with professional quality and integrity; as a human being, with a kind heart and high ideals; and as a member of society, with honesty and efficiency. As a journey of a thousand miles must begin with a single step, so too we must remember these things as we step from amongst the pieces of our just-one-second-ago-broken eggshell.

Learn to live perceptively, using that key to wisdom that comes from seeing everything with a total perspective and in view of eternity. Learn through science to correlate things in space, through history, to correlate events in time, and combine all this knowledge aesthetically through the beauty of art.

"Adults are often busy. They don't answer the child's questions. And then the child goes to school and the teacher says, 'First you're going to learn A,B,C.' The child still wants to understand UNIVERSE and has big questions, and the teacher says, 'Never mind that . . . you learn the parts first . . . A,B,C . . .' Then the child goes to college and never does get back to the whole."

He wrote to the papers about it. He also told a lady who applied to him for information that cats do not as a matter of fact go to heaven, though, he added, they have souls of a sort. How much thinking those old gentlemen used to save one! How the boarders of ignorance shrank back at their approach! Cats do not go to heaven. Women cannot write the plays of Shakespeare."
